

Music Instruction

Prescription-Music also provides music lessons on a variety of popular instruments as well as voice and vocal coaching. Our specially developed intentional style has produced many fine musicians.

We teach all genres of music and stress the importance of group performance. Please contact us for more details about scheduling and location. We look forward to spreading the knowledge and power of music!

Who Are We?

Prescription-Music is dedicated to bringing joy and learning to students in the form of music. We have been **professional musicians and music educators** for many years and we play a number of instruments and also sing. In the past several years we have been working closely with

The Joy of Music has the power to stimulate learning.

education specialists and have developed an intentional style of teaching as well as programs which are comprised of recognizable **songs which motivate group involvement and interaction**. The response we get has been

extremely positive!

Music Stimulates Learning

We have discovered through numerous performances to children with varying levels of concentration that these songs performed with intention stimulate the young mind and motivate learning. By focusing our musical energy on each individual in the group and connecting with them we have been able to illicit responses ranging from hand clapping and other forms of rhythmic movement to singing along with the lyrics. This interactive style leads to an intense interest in the material which is being presented and thus becomes an effective educational tool. Not only are the children entertained by the music but they learn valuable information ranging from history to social values.

Our Mission

Our ability to communicate through music and reach out to your students enhances their educational experience and stimulates learning in an interactive group environment. We are confident that your school will be delighted by the positive and beneficial reaction of the students. Thank you for giving us the opportunity to share our joy and reach out with the educational power of music.
